

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. FIELD BATTALION, SIGNAL CORPS, TABLES OF ORGANIZATION AND EQUIPMENT.

PROPERTY ACCOUNTABILITY.

1. There shall normally be but one accountable officer for equipment C of each bureau of a field battalion and such officer will account on a separate return for all articles listed in the following tables. He will be known as the battalion supply officer.

2. When different officers serve as supply officers of the different bureaus they will be designated as "battalion quartermaster," "battalion signal officer," etc. Should local conditions make it desirable or necessary to have an accounting officer for any detachment serving separately from its parent organization, one may be designated for that purpose and the articles of equipment C that pertain to such detachment will be transferred to the designated accountable officer of the detachment, but as soon as the conditions making this separate accountability necessary cease, the account will be closed by transferring back to the unit supply officer of the parent organization the accountability for the property which had been carried separately.

3. Companies or detachments will hold on memorandum receipt from the supply officer of the battalion articles of equipment C prescribed in the following tables as provided in regulations and orders. (See Quartermaster Regulations and Par. I., G. O. No. 6, War Department, 1916.)

4. Under normal peace conditions the organizations will keep their equipment C as prescribed complete and in serviceable condition. If ordered for field duty, this full equipment will be taken to the mobilization and concentration points. If ordered on active field duty, where equipment B and equipment A not required for actual strength can not be taken, it will be disposed of by the battalion supply officer as conditions require, by turning it into a camp supply officer or depot, or by disposing of it as otherwise ordered. The same course will be followed at any time during active field service, should equipment become surplus.

5. The battalion supply officer will obtain replenishment of equipment C by furnishing the post, camp, division, depot, or other proper supply officer in exchange for articles of replenishment, either unserviceable articles worn out through fair wear and tear, or properly approved inventory and inspection report, survey report, statement of charges or certificate of expenditure.

6. When, in compliance with competent orders equipment C has been reduced by any part of it being invoiced by the battalion supply officer to another accountability, it will be replaced by the battalion supply officer certifying the facts on his requisition. If equipment C has been increased in any way above that prescribed, the supplies, when no longer necessary, will be invoiced to some accountable officer at the first opportunity.

7. Replenishment of equipment C will habitually be obtained through the battalion supply officer, but no entry of the transaction will be made in his account unless necessary. In emergencies, an organization commander may obtain replenishment by any of the methods prescribed for the battalion supply officer, but when such action is taken he will promptly report the transaction to the battalion supply officer.

8. All garrison equipment and other Government property (including ammunition for target practice), except equipment C, will be held by organization commanders on memorandum receipt from the post or other supply officers. If ordered to field duty, all articles of the garrison equipment held on memorandum receipt by organiza-

tions will be turned over to the post supply officer, and none of it will be taken with the organization, except as may be specially ordered by the next higher commander.

9. When a battalion is separated from a supply depot and the situation demands a reserve stock on hand, such reserve will be accounted for on the same return and in the same way as equipment C, but so soon as the necessity for carrying this reserve stock ceases the surplus will be invoiced to the proper accountable officer. The fact of having on hand a reserve will not be authority to issue on memorandum receipt to a company or other smaller organization any property in excess of its prescribed equipment C. If articles not listed as part of equipment C are necessary they will likewise be carried on the same return, but as soon as a post, depot, or camp supply officer is designated, such property will be invoiced to him.

10. Returns for property for which the battalion supply officer is accountable will be made according to existing regulations and orders.

The foregoing list of articles is prescribed for each escort wagon and team wherever used. The oscillating tool box may be fitted on the escort wagon of any model.

Fuel allowances:

Fuel is obtained as needed, which on the march will ordinarily be from day to day. It is not therefore prescribed as baggage. The amounts of fuel shown in the tables of allowances are based on requirements for average conditions. In certain instances the full allowances given will be in excess of actual requirements, in which case only such quantities as are actually required will be issued. Where conditions require the issue of allowances in excess of that shown, authority must be obtained from the department commander or commanding general in the field.

The prescription in the foregoing tables to the effect that the allowances of fuel for heating purposes will be fixed by the commanding general (or division commander) contemplates that the organizations are integral parts of a division on the march or in camp. Under other circumstances, the allowances for heating purposes should be fixed by the commanding officer.

- 1 cap for speedometer opening.
- 1 canvas hood.

Mast, type F—

- 1 top section.
- 1 bottom section.
- 8 intermediate sections.

Radio pack sets, complete—Continued.

Each unit contains component parts as follows—Continued.

Mast, type F—Continued

4 intermediate sections, extra (3 for tent).

1 antenna.

1 counterpoise.

9 carriers, wire.

4 pins, antenna.

2 hammers.

1 set adapters for tent (4 pieces).

1 bag, for antenna and counterpoise.

1 bag, for accessories.

Pack frames, sets—

3 frames (1 set); each frame is complete with cincha, 2 cincha straps with ring and snap hooks, and 2 straps with snap hooks at each end.

Tent—

1 tent.

Wire carts, type L, complete. The Signal Corps wire cart, type L, when issued as "complete" will consist of the cart proper, together with the following enumerated detachable parts, extra parts, and tools:

1 axle, extra (drawing 1257).

2 bands, brake (drawing 1258).

2 bearings, extra, for reel (drawing 1260).

1 can, oil, steel, pint size.

1 canvas roll (drawing 1133-1), provided with the following tools—

1 chisel, cold, 1-inch.

1 screw driver, 5-inch.

1 screw driver, 10-inch.

1 hammer, claw, 16-ounce.

1 wrench, monkey, 8-inch.

1 pliers, side-cutting, 8-inch.

1 wrench, S, 1-inch and 1-inch flats (W. & B. No. 674-B).

1 wrench, S, 1-inch and 1-inch flats (W. & B. No. 672-D).

1 wrench, alligator, 9-inch (W. & B. Bulldog, No. 2).

1 chain, for tongue support (drawing 1128-2).

1 crank, reel (drawing 1132-3).

1 doubletree (drawing 1129-1).

4 insulators, strain, electrose, for traces (W. E. No. 700323).

2 pads, hand, leather.

1 paulin (drawing 788-1).

2 singletrees (drawing 1129-1).

1 tongue (drawing 1128-2).

1 wheel, extra (drawing 1116-1) (issued to Organized Militia only).

1 wrench, wheel (drawing 1132-3).

1 wrench, socket, for axle bracket nuts (drawing 1132-3).

1 yoke, neck (drawing 1130).

NOTE.—When wire carts are received lacking any of the above enumerated equipment, extra parts, or tools, steps should be taken to have the carts and accessories made complete.
